## History

Those who choose to wear a TFP timepiece explore a new trend of **personal luxury**, becoming a **testimonial of sustainable elegance**. They are individuals who perceive themselves definitively linked to the fate of our Planet, with respect to which they do not accept any compromise. Not even in the choice of accessories, which, on the other hand, they interpret as distinctive elements of their identity and lifestyle.

TFP dedicates its watches to these **modern "explorers"**, resorting to the use of recycled and eco-friendly materials, which are entrusted with the task of protecting and enhancing the precious **Swiss Made movements**, exclusively **automatic mechanical**, and accompanied by **Italian leather straps**, selected by TIME for PLANET, and tanned with vegetable products. All with the unmistakable **Made in Italy taste and design**, and the constructive **guarantee of Swiss Made**.

The TFP 2020 collection leads to an ideal reunion with the essential elements to the life, which animates the Planet.

## Note

TFP dedicates this model **to time**.

In the past, our planet has always been traveled and explored by man, and only the ability to measure time has allowed us to really know it. Today **space and time are even more connected** and our explorations often lead us to move in both dimensions, be it **a trip, a city, an event or simply looking inside ourselves**.

TFP meets this research to fully explore the different dimensions, also through its COUNTDOWN model, which allows you **to set appointments / deadlines up to 6 hours before or after**.

**COUNTDOWN** is a 2 hands + small seconds watch, with rotating ring bezel, in ceramic, with casted steel case, engraved case-back, curved dial, double domed sapphire crystal. Automatic **Swiss Movement**. The watch is **waterproof up to 200 meters (20 ATM)**. The strap, in **vegetable tanned Italian leather**, has an **effective quick change system**. The bezel **allows a countdown**, having engraved the **references up to +/- 6 hours**.

## Technical Features

<i>Movement</i>	<b>Automatic Swiss Made Movement,</b> 28.800 A/h. Power reserve: approx. 48 hours. Base Landeron24 + small seconds, 25 jewels date windows at 2 o'clock, stem at +30° from 12h
