## History

Those who choose to wear a TFP timepiece explore a new trend of **personal luxury**, becoming a **testimonial of sustainable elegance**. They are individuals who perceive themselves definitively linked to the fate of our Planet, with respect to which they do not accept any compromise. Not even in the choice of accessories, which, on the other hand, they interpret as distinctive elements of their identity and lifestyle.

TFP dedicates its watches to these **modern "explorers"**, resorting to the use of recycled and eco-friendly materials, which are entrusted with the task of protecting and enhancing the precious **Swiss Made movements**, exclusively **automatic mechanical**, and accompanied by **straps**, made in Italian leather, selected by TFP, vegetable tanned in Tuscany, with certificate. All with the unmistakable **Made in Italy taste and design**, and the constructive **guarantee of Swiss Made**.

The TFP collection leads to an ideal reunion with the essential elements to the life, which animates the Planet.

## Note

The Earth's atmosphere, with its peculiar composition, is a key factor for the development and sustenance of life on the Planet. For explorers of all ages, knowledge of the **distribution of winds** has proved to be fundamental, that is, the movement and direction of the air masses, the trend of which was essential **for navigation**, but also for the reproduction of flowers, plants and crops.

TFP dedicates this model to **air and wind** and to the modern "**Explorers of the Planet**" whether they explore Cities, Lands, People or Nature, to guide them in the **daily journey of their lives**.

**WINDROSE** is a 3 hands watch, with fixed ring bezel, in steel or ceramic, with casted steel case, engraved case-back, curved dial, double domed sapphire crystal. Automatic **Swiss Movement**. The watch is **waterproof up to 200 meters** (20 ATM).

The strap, in **vegetable tanned Italian leather** or HPR pro-dive, has an **effective safe change system**. The degrees of a compass and the 8 directions of the main winds blowing in Italy are engraved on the bezel.

## Technical Features

<i>Movement</i>	<p><b>Automatic Mechanical Swiss Made Movement</b>,                  28.800 A/h. Power reserve: approx. 36-40 hours.                  Landeron 24 or Sellita SW200                  date window 180° starting from stem                  stem at -30° from 09 h or at - 30% from 03 h</p>
